nfdh.

better data, better decisions

June 2023

National Freight Data Hub (NFDH)

Our vision To capture, improve, standardise and share high quality and timely freight data to ensure the freight sector is efficient, safe, productive and resilient.

Purpose

Improve the capture and sharing of freight data to support day-to-day operations

Evaluate how the freight system is performing and what actions we can take to improve it

Improve strategic planning for infrastructure and transport network investment and other decisions

Benefits

Improve access to secure data

Compare Australia's supply chain costs

Enhance supply chain visibility

Improve efficiency, safety and resilience

Share and use freight data

The NFDH will help government, industry and communities to...

Identify the proportion of traffic that is freight

Track and assess network performance

Understand what, where and how freight is moving

See physical and regulatory bottlenecks and barriers

About

Every Australian, everywhere, every day, relies on freight.

Funded by government through DITRDCA, the NFDH is a key priority under the [National Freight and Supply Chain Strategy](#) that is currently delivering:

13 projects

220+

freight datasets in the [catalogue](#)

10+

interactive [visualisations](#) and [insights](#)

across

all transport

modes
